

TECHNOLOGY & COMMUNICATIONS

Ireland is one of the leading manufacturers of technology and communications equipment in the world. To continue at the forefront of this 'smart' economy, the Green Party has;

- Overseen a **doubling** of **domestic broadband** subscriptions from 600,000 to 1.5m in two years
- Invested €1.5 billion of public and private monies in our **broadband networks** and services
- Launched a **€230 million National Broadband Scheme** to bring broadband to those areas without access

TECHNOLOGY & COMMUNICATIONS

Ireland is one of the leading manufacturers of technology and communications equipment in the world. To continue at the forefront of this 'smart' economy, the Green Party has;

- Overseen a **doubling** of **domestic broadband** subscriptions from 600,000 to 1.5m in two years
- Invested €1.5 billion of public and private monies in our **broadband networks** and services
- Launched a **€230 million National Broadband Scheme** to bring broadband to those areas without access

Other technological supports include:

- €13 million for the **Broadband to Schools Scheme** delivering 100 megabit broadband to 78 schools, with more to come
- New **€70m digital network** to be built by RTE, which will free up valuable spectrum for broadband
- The **exemplar network** – a unique fibre-optic communications network which solves costly bottlenecks of data, launched by Eamon Ryan in 2010
- IDA investment in the **Tyndall National Institute**, Cork, a new energy and security research centre which will drive 'smart economy' investment
- €30 million project building a new **direct telecommunications link** with North America
- **New postcodes system** for Ireland currently being designed to bring Ireland's information infrastructure into 21st Century
